**PROACT** standardizes your RCA methodology and reporting.

**PROACT** demonstrates Return On Investment for your RCA.

**PROACT** is applicable in every facet of healthcare.

**PROACT** helps a facility easily determine the Significant Few.

**PROACT Enterprise Risk Management System**

**What is the PROACT® Enterprise Risk Management System?**

Healthcare today requires practical, efficient, cost-effective tools to achieve patient safety. Driven by demands from accreditation, private payers, government regulators and consumers, healthcare entities want reliable methods that can help them identify and overcome problem areas in the delivery of patient care.

PROACT offers healthcare entities a powerful yet practical tool for this purpose. With a focus on Failure Modes and Effects Analysis and Root Cause Analysis, PROACT exceeds the expectations found in the JCAHO Patient Safety Standards. It goes further, providing healthcare entities with reliable data upon which to effect systemic change. And, unlike other tools, PROACT enables users to recognize cost savings from the investment in the technology. With money and time saved in optimizing patient services, the return on investment in PROACT can help expand patient and process improvement initiatives.

**PROACT® ERM System Benefits**
