Consulting Services

Practical, focused, consulting services for today's healthcare facility and physician groups.

- Risk management assessments on specific practice or process areas
- Design and develop risk management plans and programs
- Improvement strategies for existing risk management programs
- Development of clinical risk management policies and procedures
- Design risk management tools for healthcare organizations and physician practices
- Integration of quality improvement, risk management and patient safety programs

Sample engagements include:

- Design of a root cause analysis policy and procedure
- Consent policy for ambulatory surgery
- Failure mode and effect analysis
- Development of "adverse outcome" disclosure policies and procedures
- Family practice office practice risk management assessment
- Development of a home health agency risk management tool for contract review

Consulting Services are designed to client specifications. Our risk management services are not a substitute for legal advice. We work with clients and their legal counsel to design practical solutions to today's challenging and complex risk management issues.
