

YOU ASKED AND RCI LISTENED!

Recently we ran a campaign to ask our customers what analysis they'd like to see exemplified and we received an overwhelming response to "Injuries".

Our CEO, Robert J. Latino has created this quick movie to show you how this injury was analyzed using the PROACTOnDemandSM RCA web application & PROACT Methods.

- **Evidence was collected**
- **Interviews were recorded**
- **Inspections were performed**

All items were entered into the analysis and the root cause analysis began. See the organized method to asking "how could" and drilling down to "why" – uncovering all the root causes to this injury. [Visit Now](#)

On a larger scale, Mr. Latino provides us with a very in-depth look at the Challenger space shuttle incident.

All interviews, reports and images were public knowledge and used to create this analysis.

What did we learn from this analysis?

Watch the movie to find out all the root causes of this unfortunate incident. [Visit Now](#)
