Learn How To Fish

“Give a man a fish and you feed him for a day. Teach him to fish and you feed him for life.” This well-known proverb is a fitting introduction to Reliability Center’s powerful PROACT® Suite.

The PROACT® Suite not only identifies an organization’s most significant annual losses—it supplies the knowledge and tools to identify all the causes and then eliminate their recurrence in the future. This has been made possible by combining the award-winning PROACT® Root Cause Analysis (RCA) Software with the powerful LEAP™ Analysis Software.

LEAP™ & PROACT®: A Winning Combination

I. LEAP™ Analysis Software identifies what COULD go wrong or what HAS gone wrong, using Basic Failure Modes & Effects Analysis (FMEA) and Opportunity Analysis. The end result is that LEAP™ builds a business case for which events are the best candidates for Root Cause Analysis (RCA) based on the Return-On-Investment (ROI).

A. Basic FMEA – The utilization of probabilistic values to determine the most critical, potential events in an organization.

B. Opportunity Analysis (OA) – The utilization of historical data to identify the factual losses that HAVE occurred in an organization. This allows the user to review losses over a year’s period and to be able to multiply their frequency of occurrence times the losses per occurrence. The outcomes will astound you!

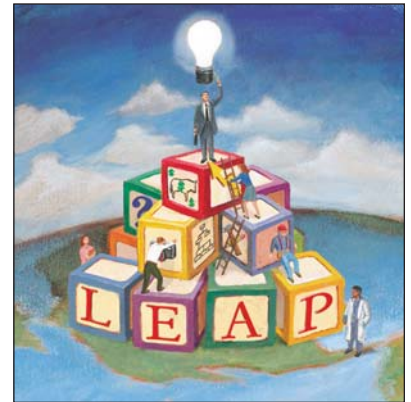

II. PROACT® RCA Software uses an investigative approach to RCA to examine the candidates of the LEAP™ Analysis. The PROACT® RCA discipline involves:

- PR**eserving Event Data
- O**rdering the Analysis Team
- A**nalyzing the Event Data
- C**ommunicating Findings & Recommendations
- T**racking for Bottom Line Results

PROACT® RCA provides the tools for the RCA analyst to easily document, validate, report and track findings and recommendations. PROACT® RCA puts the collective experience and knowledge of seasoned analysts at the fingertips of those at remote sites who could learn from their results. Average ROIs can range from **3,000% to 17,900%** (as documented in the best-selling book *Root Cause Analysis: Improving Performance for Bottom-Line Results*: ISBN 0-8493-1318-X).

Enduring Potential

The combination of these powerful tools into The PROACT® Suite provides unlimited potential. Together, the data collection and management creates a knowledge warehouse accessible to others in the company through the PROACT® Enterprise platform. Users learn from each other, raise their overall skill and awareness of their surroundings and produce unbelievable ROIs. Ongoing use makes regulatory compliance a breeze, cuts costs dramatically, and causes productivity to surge—both now and in the future.
